COURSE TITLE: Local Anesthesia Update For The Dentist

COURSE DIRECTOR: David M H Lambert, DDS

PRESENTER(S): David M H Lambert, DDS

AUDIENCE: DDS/DMD

CONTACT HOURS: 3.5

MEDIUM: Webinar

COURSE OBJECTIVES

1. Review the relevant pharmacology and mechanism of action of local anesthetics
2. Review the signs/symptoms of local anesthetic systemic toxicity (LAST) and special populations at risk
3. Discuss the special patient populations requiring consideration for possible agent or dosage modifications
4. Describe the common adverse drug events associated with the administration of local anesthetics and their proper management
5. Discuss common office emergencies associated with routine dental care - including use of local anesthesia - their prevention and management
6. Describe the anatomical basis for administering local anesthesia as related to the indications for nerve blockade versus infiltration
7. Discuss general considerations for selecting a specific local anesthetic agent
8. Describe general landmarks for common local anesthetic administration techniques (inferior alveolar, infraorbital, mental, infiltration, greater palatine)
9. Describe the complications of local anesthetic administration including avoidance and management techniques.
10. Describe how to manage/mitigate the failed mandibular block and alternatives to the mandibular block.
